Estimated Gross Cash Income from Sale of Products from Ohio Farms....	62

Crop Reporting Districts

#### ACKNOWLEDGMENTS

The authors are greatly indebted to two large groups of Ohio farmers. One has cooperated in furnishing information each month; and the other has supplied special information at least once during the year by filling out and returning a livestock or acreage survey card, the results of which are contained in this bulletin.

We are also very grateful to the postmasters who, through their rural mail carriers, distributed and collected the above-mentioned livestock and acreage survey cards, which furnish the best available information regarding changes in crop acreage and numbers of livestock on farms from year to year.

### EXPLANATIONS

This bulletin contains preliminary county estimates of the acreage, yield per acre, and total production of corn, winter wheat, oats, tame hay, and potatoes for 1936; and revised estimates of tame hay for 1929 through 1935, corn for 1935, and potatoes for 1935. There are also presented preliminary county estimates of the numbers of livestock on farms January 1, 1937, and revised estimates for the numbers on hand January 1, 1936.

Revised figures for all tame hay, annual legume hay, soybeans, and hay seeds have become available since the publication of the previous statistics and are included in this issue. The number of cows and heifers, 2 years old and over, kept mainly for milk has also been revised. The State figures are being published herein. The county estimates published in the previous statistical bulletin, No. 577, have not been revised.

Estimates of acreage, yield per acre, total crop production, numbers of livestock on farms; and prices of crops, livestock, and livestock products, unless otherwise stated, are based upon the reports made by the voluntary reporters of the Federal-State Cooperative Crop and Livestock Reporting Service.

Monthly crop and livestock prices are those of the fifteenth of the month, unless otherwise indicated. Prices used in computing the value of total production of crops are December 1 prices, except for 1934, 1935, and 1936; for these years they are weighted average prices for the marketing season of the particular crop.

**OHIO FARM CROPS: Acreage, Yield, Production, and Value**  
**1934, 1935, and 1936**
